The Strength of ONE **Bioconjugation Powerhouse**

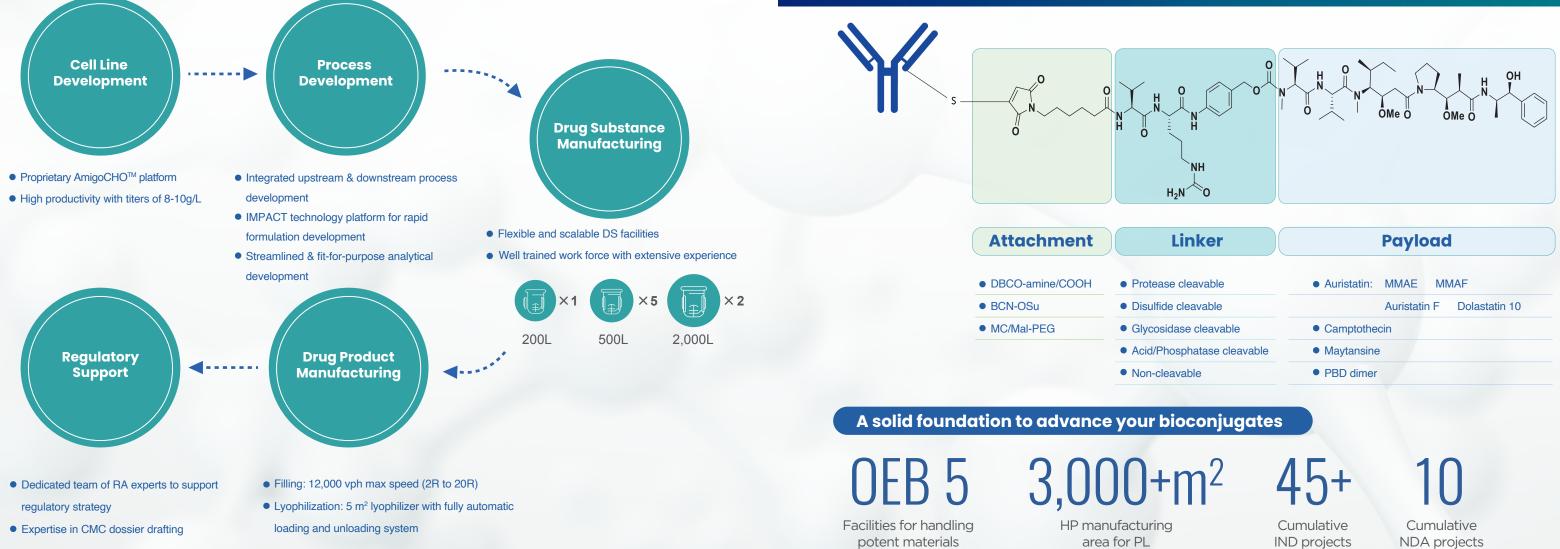

Your Reliable CDMO Partner for Bioconjugates From Development to Commercialization

AsymBio's comprehensive CDMO services enable single-source solutions to the full span of development and manufacturing of bioconjugates, which minimizes the risk of timeline uncertainty, budget control difficulty and regulatory complication due to fragmented project management by multiple vendors.

Antibodies

We build optimal paths to steer your molecules from DNA sequence to commercial manufacturing with our rich expertise and production flexibility.

Payload-Linkers

CDMO experience in small molecules.

We accelerate the development and manufacturing of your PL with our 25+ years of

Linker	Payload
ase cleavable	Auristatin: MMAE MMAF
ide cleavable	Auristatin F Dolastatin 10
sidase cleavable	Camptothecin
Phosphatase cleavable	Maytansine
leavable	PBD dimer

Antibody-Drug onjugates (ADCs)

We ensure the speed to clinic & to market on the combined strength of all ADC technologies and expertise assembled under ONE organization.

- conjugation toolboxes for efficient PD
- Strong PD expertise for cytotoxic and potent payload-linker conjugation from mg to kg

Regulatory Support

- Compliant with FDA, EMA and NMPA regulations
- Global track records of regulatory filing and approval

Manufacturing • OEB5 facilities and technical know-hows to cover a range of modality manufacturing needs Manufacturing capacity of up to 2 kg/batch

ADC DS

ADC DP Manufacturing

- Lyophilization: 5 m² & 10 m² lyophilizer with fully automatic loading and unloading system
- Filling: 12,000 vph max speed (2R to 20R)
